Comments Report

2. Module Content -

2.6) Did you find this module sufficiently challenging? Please give comments below:

- too many charts
- yes (2 Counts)
- Yes
- Yes! Was really challenging.
- Yes.
- Yesh
- Yes i did because for a person who had a technical background, I a little bit confuse to follow the class

2.7) Did you find that this module provided the necessary tools/methodologies/intellectual development to help you advance your career or improve your job prospects? Please give comments below:

- I wish we spent more time using these tools in practice rather than doing an assignment. E.g. trade simulation or put into teams to trade over a certain period with everything that we have learnt. Learning out of a textbook can only take you so far.
- I would have liked to see more examples in base metals like copper; gold,.
Considering that this course involves students from the master metals and energy finance. I would have liked an associated approach to this.
- yes (2 Counts)
- Yes
- yes, i did, the lecture has given the best example. he had mention about he spoke too fast, this is quiet reasonable i want him to a bit slower for next batch.
- Yesh

4. Teaching Assistant - Jiarui Wang -

4.6) Please enter any feedback on the Teaching Assistant below.

- Great Teaching Assistant
- I hope in the future every tutorial has a clear recording because sometime students want to review more than 1.
- So good!So responsible!
- TA is good,
- Very good tutor. Clearly handles the contents. Explains clearly. Totally different from the experience of the previous train where the tutors of the ipm and math for finance courses were very bad.

5. Learning Environment and Support -

5.1) Please comment on the learning environment that impacted your experience in this module (for example: the Hub, video conferencing technology, discussion platforms, support staff, etc.).

- Clear and competent lecturer.
- goodgood
- The Hub
- There was too much switching of classrooms. They should all have been in the business department. This impacted on the recorded classes. As they are not on the same standard.

Another issue to improve is the recordings. Many blackboard exercises that the teacher did cannot be seen on the recordings. The standard of the first term was much better.

6. Overall Feedback -

6.1) What did you like most about this module?

- Everything (2 Counts)
- For the whole previous term I couldn't understand SDF. It took savi a few sentences to explain the concept to me.
Savi's risk neutral pricing lectures are fantastic
- good
- The lecturer's way of explaining every topic
- The teacher. Really knowledgeable, tries to understand the best possible what the students ask him, shares about his experience, gives past papers to prepare etc.

6.2) What would you most like to improve in this module?

- good
- Recording class.
- TA is good but it is a shame we can't see the board on the recordings, almost impossible to come back on stuff did in Tutorials
- To remove the group assignment and to make us trade or use the products freely over a certain time period rather than enforcing a trade idea that may not be there.
